THE VISIT.

"The swestest woman ever fate Perverse denied a household mate,"—Werrrien, Tis twilight of the day, and twilight of the year; The leaves are turning sear, The green is growing gray. It is a little room, So neatly dressed and still; Which fostered roses fill with subtlest of perfume.

A zephyr lurking by, Betrays the curtained bed— Did ever mortal head On either pillow lie? That pantomimic fire— Hew clear its cozy glow: It gestures ever so, Behind the woven wire, But hush! The lady comes,

As softly as the hours;
'Tis sweeter than her flow'rs—
The melody she hums, She deftly locks the blind, And draws the night-shade low; While with her gown of snow The kitten toys behind. Her bands are faultiess fair, Her movements all of grace; And hers a queenly air For such a lowly place,

She sits and bows her head-What do the shadows say?— Her volume of the day Lies open and unread, The beauty of her face, Where lives a dreamy light, No suffering shall hlight, Nor weary years crase, She sighs-now lifts above The worship of a tear: And angels waiting near, Record a wounded love.

WOULD SHE OR NOT?

New Apparatus for Steering Balloons.

The London Times says. "The inventor of the balloon steering apparatus which is awaiting trial by the war department at Woolwich is Mr. C. A. Bowdler, whose plan has been under the consideration of the war office for two years past. It has been subjected to some preliminary trials by means of models on more than one occasion. These trials being made within doors and in a still atmosphere, are said to have demonstrated the practicability of navigating balloons in a still atmosphere. The object of the forthcoming same end can be attained in the open air under slightly adverse circumstances, for to sail the balloon in opposition to a strong wind is at present unthought of. It will be regarded as u great and important result if the baloon can be steered even a single point from the direction of the wind, though there be ever so slight a breeze. The himself, the dog in the next yard hits inventor, with Mr. Coxwell and Mr. Orton, another well known aeronaut. who is taking an interest and some part in the experiments, was again at the Royal Arsenal, Woolwich, yesterday, making arrangements for the ascent with Lieut, Edwards, R. E., who is in charge of the works department, but the wind was again unfavorable, blowing with considerable velocity and lirectly seaward. The steering apparatus brought down in a cab, consists of a screw propeller like that of a ship, of metal made as light as possible, and is to be fixed to the car horizontally, and ously requires : First, a beach drass: made to turn at the rate of about four- second, a breakfast dress; third, a by the same gear, is designed for rais- cept the beach dress. At least thirty any expenditure of gas or ballast, and | three in a trunk, a disk shaped rudder of canvas to steady | They parted in sorrow, they parted in the balloon completes the apparatus, tears. The husband was to remain at Mr. Coxwell much prefers the small Bordeaux, for he had a situation there; screw propellers, which are but three the wife was to go to London as a govfeet in diameter, to those proposed by erness, and they filled the railway staa French seronaut, which are to be six- tion with the noise and sorrow of their teen feet high, and are therefore re- parting. "Do not cease to love me, before, and as the thread is thought garded as unmanageable and dangerous and do not forget that you are the wife to the balloon, especially in the descent. of a decent man," said the husband. The screw will probably be made some- "Never, never," said the wife, and she what larger if the trial is in the least | pulled out her handkerchief and tied a degree successful, but it is considered preferable to increase their power, if necessary, but multiplying the speed of revolution by the use of some other motive power than manual force, either "Fay," writing from Saratoga to the Louisville Courier-Journal, says: even the steam engine—an agent which 'Yonder is a maiden lady whose hair has hitherto been discarded on account off it, and so stony that we had to slice off it, and so stony that we had to slice our regime and so required them adversaries of the same of the steam engine.

THE little mind that loves itself will write and think with the vulgar; but the great mind will be bravely eccentric, and scorn the beaten road, from universal benevolence. - Goldsmith. "There will be no newspaper in reaven," said a Brooklyn clergyman, exultingly. "Then you can't give me the first proof of it," retorted a man in the congregation. He was an editor.

Speaking of engagements, there is a lovely little blonde, aged ten, at Sara-togs, who wears a diamond solitaire on her engagement finger, and is actually betrothed to a young man of nineteen. "Have you got a little Indian there?" said the engineer, as we passed a young squaw with a papoose, standing at a depot on the Pacific railroad. "No," said she; "half Injun, half Injuneer!"

A FIRST IMPRESSION .-I recollect nurse called Ann, Who carried me about the grass, And one fine day a fine young man

Came up and hissed the pretty iscs. She did not make the least objection! Thinks I, "Ah!
When I can talk I'll tell mamma,"—

And that's my earliest recollection. WHEN they told an Indiana woman hat her husband had been sliced up by a reaper, she impatiently replied: "Well, take the pieces to the barn; I can't leave the gooseberry sauce just now. The expression of a nervous woman's face, upon getting into a dentist's cl

in-law, sharply inquiring if that spare room is ready. THERE are forty-two catacombs in and around Rome, with galleries five and it is estimated that from four to seven millions of bodies have found

is something that no man can imitate

until he gets a letter from his mother-

HERE is a recipe for getting up a ashionable summer bonnet: Let the lady run her head into a sheaf of oats, and afterward stick in a few field-flowers here and there to light up her coiffure, and the thing is done.

There is one recent decision of the treasury department in which a thankful public, or the adult portion of it at least, will readily acquiesce. It is that children's whistles, tin horns, etc., are " not musical instruments." An Irishman found a government planket, and rolling it up put it under

his arm and walked off, saying: "Yis,

that's moine. U for Patrick, and S for

McCarty; be me sowl, but this learnin' is a foine thing, as me fayther would say; for if I hadn't an edication I wouldn't have been afther findin' me blanket. These is a time in the going to sleep of weary men when a noise, continued for fifteen minutes, deprives the wouldbe sleeper of an entire night's rest, With a sagacity which is of the devil

upon that particular time to do its

barking, and only its thick-headed owner can rest. THERE is still trouble as to the sort of statue that shall be placed on the Vendome column in Paris. Some want the Imperial Napoleon, others prefer the Little Corporal, others would like the Goddess of Liberty. One of the piquant suggestions is that a magnificent political weathercock would be both ornamental and useful
